CS700 / MD-380 Code Plug Versions

To tell what version of code plug your CS-700 has, check the number and names of the zones

eg if you cycle through the zones and do not see a zone called "**Vxxx**" but do have a zone called "**3825**" then your plug is a version 05, or if it had only 5 zones including "**ZL2DMR**" and "**ZL4DMR**" then it is a version 03

Version 02
Had only 4 zones, **WLG DMR**, **WLG Analog**, **STSP Repeaters**, **National System**

Version 03
Had only 5 zones, **ZL2DMR**, **ZL4DMR**, **WLG Analog**, **STSP Repeaters**, **National System**

Version 04
Had 13 zones but does not have zone '**3825**'
Analog zones added for all 70cm FM repeaters, split in to three zones due to numbers
zones for generic DMR channels added
contacts list updated

Version 05
Had 14 zones including '**3825**' for Masterton
contacts list updated

Version 06
Had 15 zones including **ZL2OA**, introduces a version control zone '**V06**'
renamed zone "**3825**" to "**ZL2OA**"
Corrected errors in CTCSS settings for some analog repeaters
contacts list updated

Version 06a
Adds channels and zones for **ZL2KB**, **Hawkins Hill**, updates to contacts list,
version zone is V06a
DMR zones now all have 'local', 'VK/ZL', 'WW', 'NA', 'WWE' talkgroups for the local repeater and 'local' and 'VK/ZL' talkgroups on nearby repeaters, as well as digital simplex and an appropriate National System channel all on the selector switch to make it easier to change repeater when mobile.

Version 07
Renamed zones to geographical locations, Porirua, Kapiti, Wairarapa etc, added zone for Hamilton
updates to contacts list,
version zone is V07

Version 07a
